TEXXI

Zipper and hook and loop fastening systems... together for the innovation.

The Company

Located in Arosio, not far from Milan, in a 2.000 square metres property plant, Texxi (in the past Teximport) has been working in the zipper and hook and loop business for many years.

Since 2002 our manufacturing plant has been established in Hungary where our sister company Unit, through a modern organization of the manufacturing processes, integrates creativity with care and punctuality. Thanks to its very good quality and its continuous development of new technological solutions Texxi-Unit is now a dynamic and innovative reality that is growing quickly.

The Market

At Texxi-Unit everything is arranged to offer a high-standard relationship to the customer. This result is due to the efficiency of the manufacturing processes that ensure flexibility and quick replies to market demands: from large orders to limited series, from the easiest projects to the most exclusive and original ones. Texxi-Unit is now introduced everywhere with its fasteners from clothing to furnishing, footwear, leatherwork, technical and industrial sector, automotive, etc.. Already well-known on the Italian market for the high quality of the products, the objective is now to widen its business towards the foreign markets.

The Service

For every single order received, Texxi-Unit forwards a sales confirmation within few hours advising the expected delivery date that is punctually respected thanks to its well-organized and certified production.

Moreover, for the basic products Texxi-Unit has availability of a wide range of colours, sizes and colors ready in stock to meet the most urgent requirements.

The Offer

Texxi-Unit is specialized in the manufacturing of any sort of zipper, nylon, plastic and metal, all types and lengths, as well as hook and loop fastening systems for many application fields and yarns. The whole range offered by Texxi-Unit is divided into three business groups :

- zipper
- hook and loop fasteners
- sewing threads

The Quality

Every production stage is carefully checked in order to have a top quality finished product that is easy to use and esthetically nice to satisfy any field of application. Texxi-Unit has installed a Quality System both in Italy and Hungary, and achieved **UNI EN ISO 9001:2015** certification. Our hook and loop fasteners are certified **OEKO-TEST STANDARD 100**. Texxi-Unit can guarantee to use only harmless, atoxic and anallergic materials to ensure top quality with respect for the people and the environment.

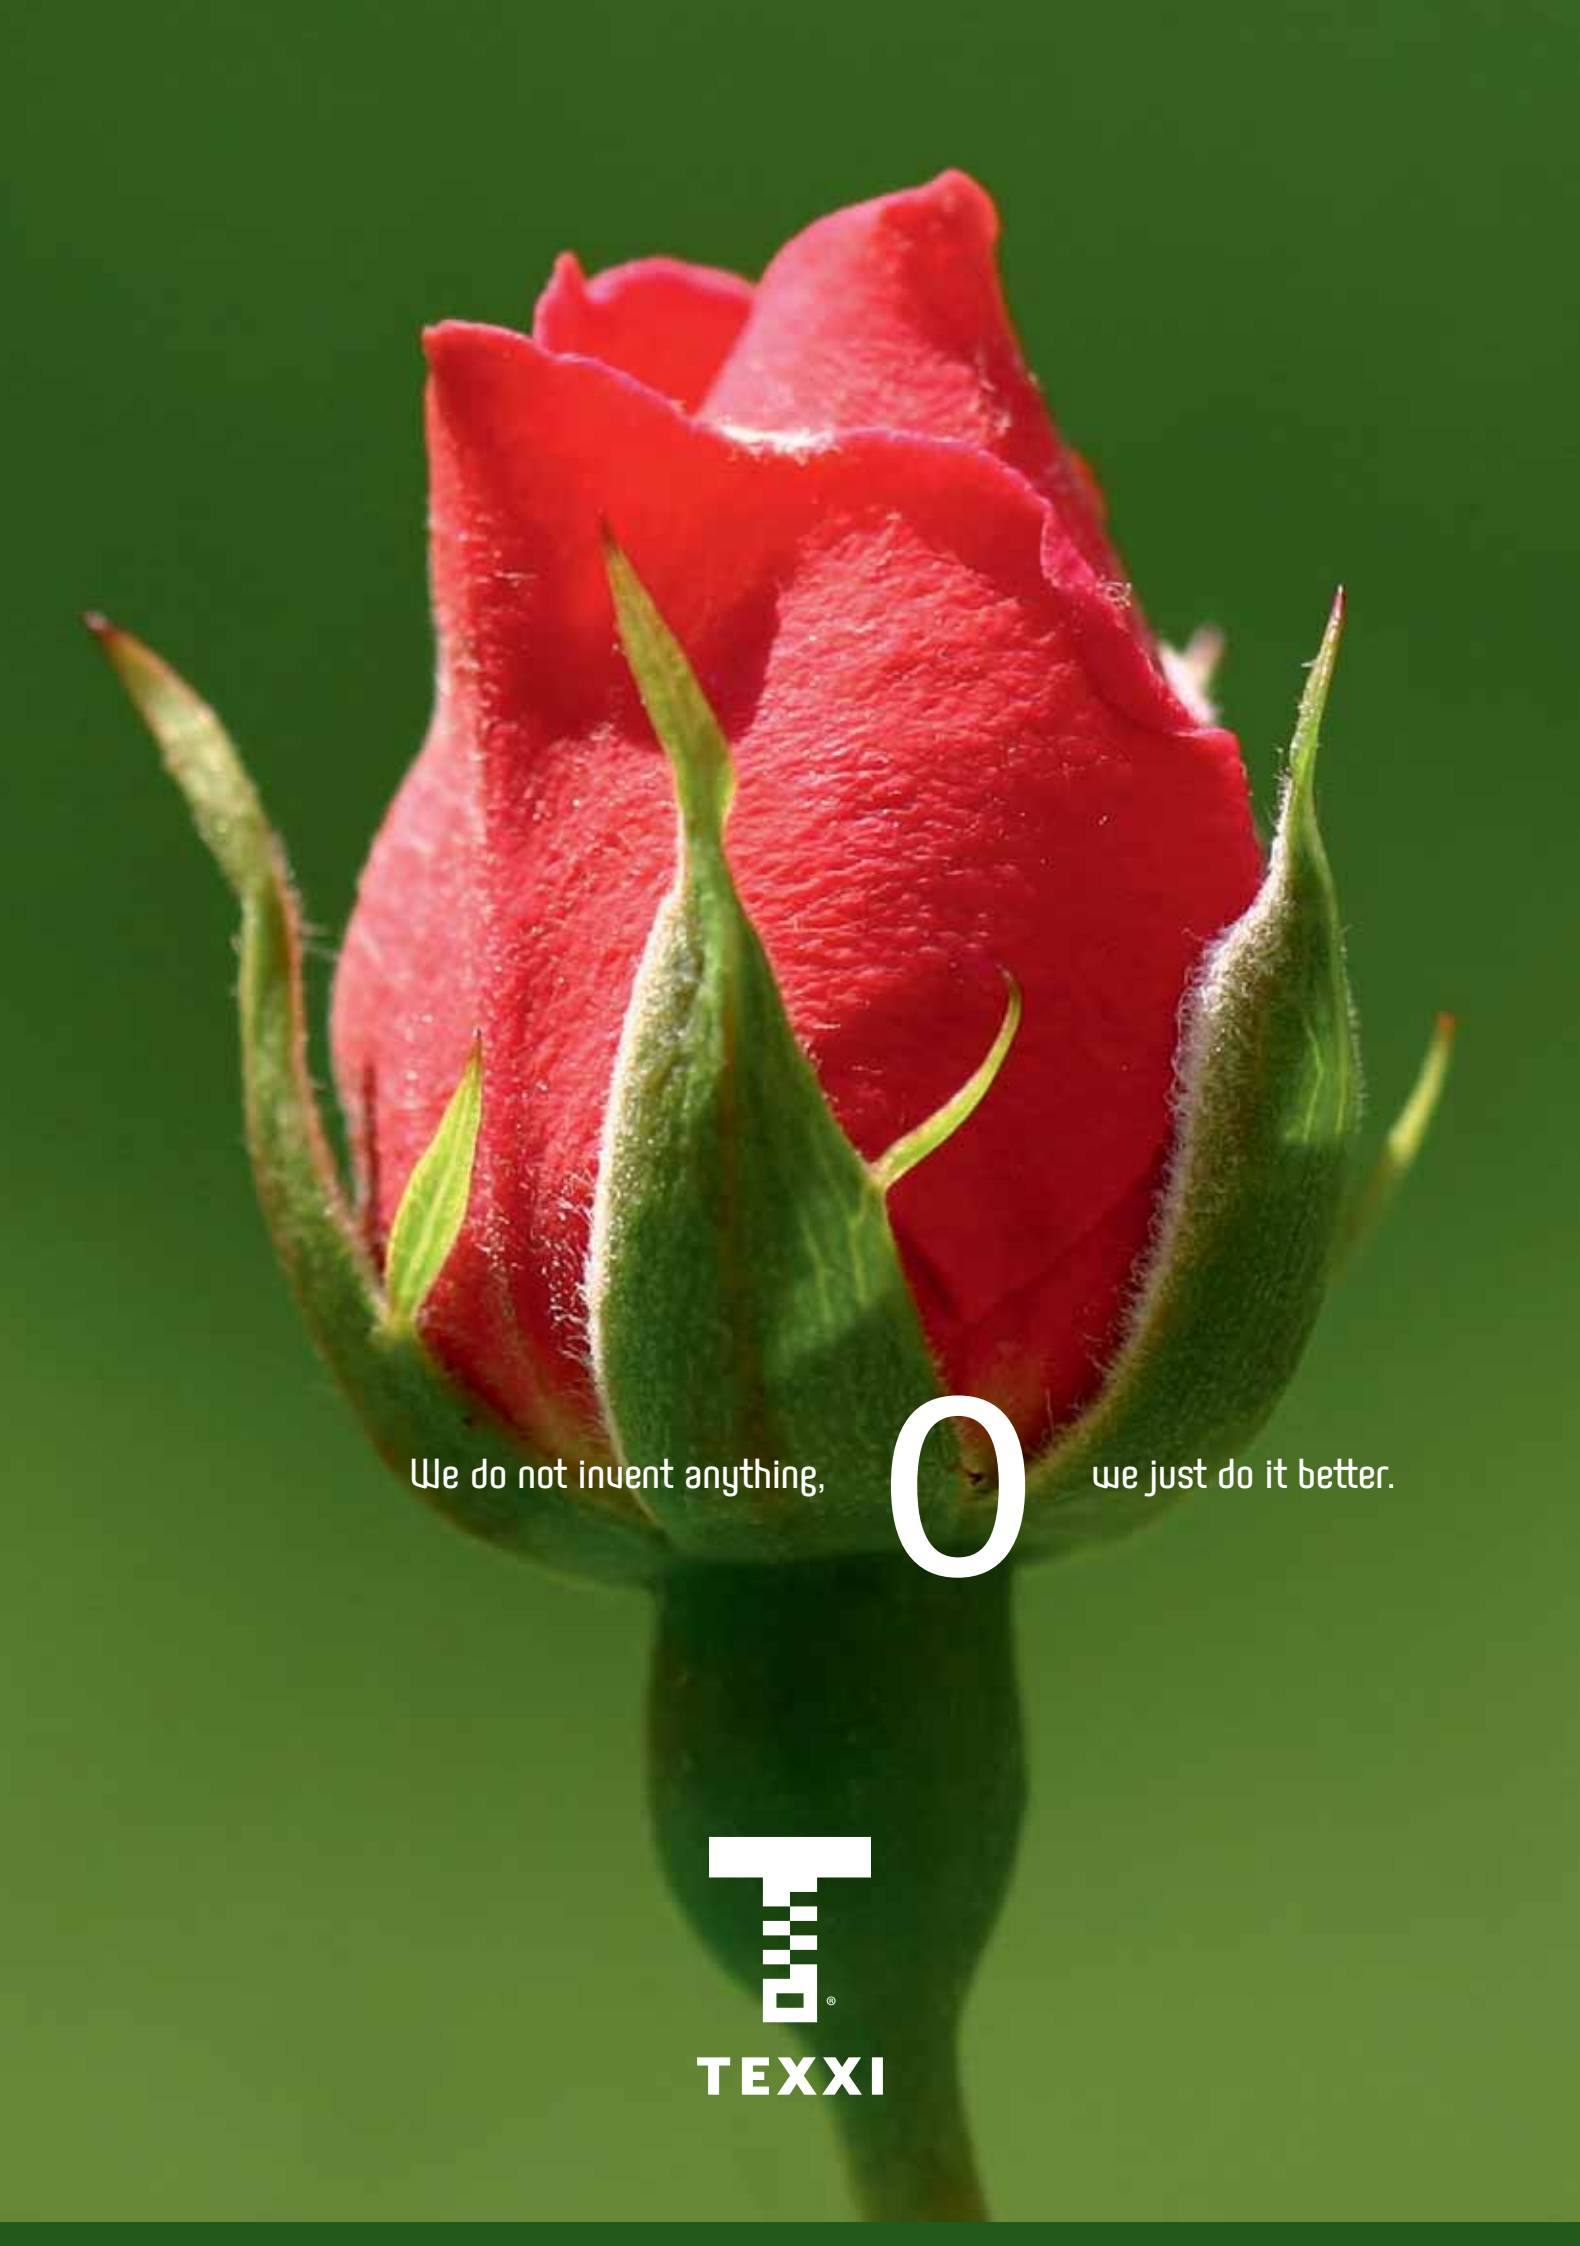

The Innovation

The success of Texxi-Unit is due to its project skills, and technologic know how.

The most innovative ideas and constant research of new solutions to solve even the most difficult customized demands come from the direct practical experience, from the daily contact with the customers and their problems. Our laboratories and manufacturing lines have technologically advanced machines: their value is well-known for the variety of activities and quality of the products.

Quality certifications

We do not invent anything, 0 we just do it better.

Technical Information and glossary

Kinds of zipper

01 Close-end

With top-stop and bottom-stop.

02 Open-end

With top-stop, pin and box.

03 Two ways open-end

With top-stop, pin and pin.

04 Close-end double slider "Y".

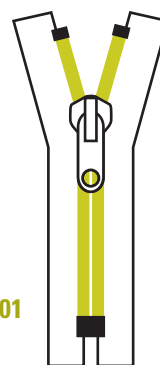

With top-stop, bottom-stop, two divergent sliders.

05 Close-end double slider "X".

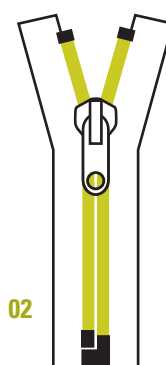

With double top-stop, 2 divergent sliders.

06 Close-end double slider "I".

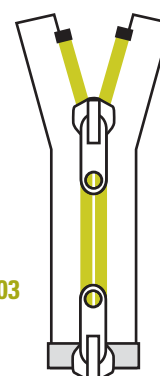

With double bottom-stop, 2 convergent sliders.

Plastic zipper

Always open to the fashion evolutions but not only.

Texxi-Unit plastic zipper, light, versatile and practical, are the result of a great commitment in the use of new materials. For this reason they are popular as flexible products, fashion-oriented, to be elegant and natural but also suitable for more technical applications where resistance and reliability become essential. Fluorescent colours, transparency, and metalized chains with fantasy tapes and original chromatic matching together with a wide range of sliders and pullers increase the value of plastic zipper Texxi-Unit.

TEXXI

Hook and Loop fastening systems

01 Hook and Loop standard tape

100% polyamide for durability and resistance (up to 10.000 life cycles). It can be sewn, washed, cut to any length.

Applications: clothing, leatherwork, footwear, furnishing, medical, transportation, automotive, etc.

- Standard widths:
16/20/25/30/38/50/100/150mm.
- Standard color: see color card.
- Other colors/widths: on demand.
- Packaging: 25 metres flanged rolls or consumer box 25 + 25 metres.

02 In aramidic fibre

Applications: racing wear, air pilot suits, tank suits, fire clothes, technical and working suits.

- Standard widths: 25/50mm.
- Colors: natural and olive green.
- Packaging: 25 metres flanged rolls.

03 Hook and Loop FRT tape

With the same characteristics as the standard tape, it is processed by fire retardant complying with F.A.R. 25853.

Applications: aircraft, working suits, technical clothing, etc.

It is also available a pre-coat adhesive to be reactivated by high frequency.

Main applications: tarpaulin, gazebo, tents, curtains, plastic materials in general (PVC).

04 Pressure sensitive Hot-melt adhesive PSB#1

Hot-melt adhesive made of rubber resin

Temperature range: from -20°C to +70°C.

Coins, pre-cut and cut pieces, customized lengths can be supplied upon request.

Compared with acrylic adhesive PSB#5:

- Resistance to high temperature and migration:
PSB#1 < PSB#5
- Price: PSB#1 < PSB#5
- Adhesion time: PSB#1 < PSB#5

STANDARD
100

Hook and Loop fastening systems

05 Pressure sensitive acrylic adhesive PSB#5

Its base material is a 100% acrylic solvent polymer. Resistant to high temperature and to plasticize migration. Good U.V. and water resistance.

Temperature range: from -20°C to + 130°C.

Coins, pre-cut and cut pieces, customized lengths can be supplied upon request.

Compared with hot-melt PSB#1:

- Resistance to high temperature and migration: PSB#5 > PSB#1
- Price: PSB#5 > PSB#1
- Adhesion time: PSB#5 > PSB#1

06 Unimagic tape

It is a single self-engaging component with hook and loop on the same face and rows of loop higher than the rows of hook to avoid scratches on clothes

- Standard widths: 20/25/50/100mm.
- Packaging: 25 metres flanged rolls.

07 Unbrushed Loop

Un-napped Loop, ideal to close with standard Hook; less peel strength than regular Loop but very good shear strength even after many open and close cycles.

FRT upon request

Applications: fashion clothing, sports and technical clothes, military sector, mops.

- Standard widths:
16/20/25/30/38/50/100/150mm.
- Standard colours:
see our Hook and Loop color chart.
- Other colours/widths: upon request.
- Packaging: 25 metres flanged rolls.

Movimento
Shear

Movimento
Peel

08 Back to Back

Available in different combinations:

Hook + Velour, Hook + Loop, etc.

Just a simple touch and it attaches onto itself for a secure closure without buckles.

- Standard widths:
16/20/25/30/38/50mm.
- Standard color: see color card.
- Other colors/widths: on demand.
- Packaging: 25 metres flanged rolls.

09 Elastic Loop

Ideal for sports products and medical equipments, straps, etc.

- Standard widths:
16/20/25/30/38/50mm
- Standard color: black and white.
- Other colors/widths: on demand.
- Packaging: 25 metres flanged rolls.

10 Mushroom standard tape

Polypropylene "mushroom" hook that provides a better performance with velour and knitted tapes. Being its peel and shear stronger than regular Hook, it is popularly used in the fields where it is required a stronger power and thinner closure than the traditional ones but less open & close cycles.

Applications: furnishing, curtaining etc.

- Standard widths:
16/20/25/30/38/50mm.
- Standard color: see color card.
- Other colors/widths: on demand.
- Packaging: 25 metres flanged rolls.

We do not invent anything, **O** we just do it better.
